Systems Engineer with experience in the development of modern web applications using Angular, React, Node.js and MongoDB. I have worked both frontend and backend, implementing functional, optimized and goal-oriented solutions. I stand out for my ability to continuously learn, adapt quickly to agile teams and apply good development practices. I seek to contribute to projects where I can add technical value, optimize processes and continue strengthening my skills as a full stack developer.

Experience

ZGames, Manta, EC **FullStack Developer**

07/2024 – 02/2026

Technologies: Angular, Node, MongoDB, Figma.

- Complete implementation of management modules (CRUD) from database design in MongoDB to UI in Angular.
- Responsive interface layout faithful to design prototypes, ensuring a consistent visual experience across different devices.
- Development and consumption of REST APIs in Node.js to connect the system, ensuring the correct flow of data between the server and the client.
- Use of NgRx to manage application information in an orderly manner, making it easy to update data in the views without errors.

Incubator Desafío Latam and Corporación 3xi, Chile **Frontend Developer**

11/2023 – 03/2024

Tecnologías: React, Zustand, Tailwind, Axios, React Router, React Hook Form, React Query, SCRUM.

- Creation of interactive views and validated forms using React and standard libraries of the ecosystem, ensuring a smooth user experience.
- Faithful implementation of designs using TailwindCSS to ensure adaptability on mobile and desktop.
- Active participation in weekly sprints, collaborating in code review and timely delivery of visual requirements.

Banco VisionFund Ecuador, Ibarra, EC **IT Intern**

03/2023 – 09/2023

- Technical support in hardware and software for different areas of the institution.
- Incident management, maintenance and control of IT infrastructure.
- Implementation of internal guidelines and support in administrative processes of the area.

Clinical Laboratory "El Ángel"

Full Stack Developer

03/2021 – 02/2022

Technologies: Laravel, MySQL, Bootstrap, ReactJS

- Development of a web platform for clinical records management, using Laravel for the backend and MySQL for data persistence.
- Creation of reusable components in ReactJS to standardize the user interface and accelerate the development of new views.
- Seamless connection between the frontend and backend via HTTP requests (Fetch/Axios), allowing real-time data updating.

Abilities

Languages: Javascript.

Frontend: Angular 17+, ReactJS, TailwindCSS, Bootstrap.

Backend: Node.js, Express.js, Laravel.

State Management: NgRx, Zustand, React Context.

Databases: MySQL, MongoDB.

Tools: GitHub, Git.

Methodologies: SCRUM.

Education

Systems Engineer

Pontificia Universidad Católica del Ecuador

02/2015 – 07/2021

Language

English A2

Certificates

[Angular from scratch \(2024\)](#)

EDteam

[JavaScript Essentials 1 \(JSE\)](#)

Cisco Networking Academy

[Front End G4 – ONE](#)
